

Online OT Security Awareness Training

Applied
Risk

Applied Risk OT Solution Snapshot

This online Operations Technology (OT) Security Awareness Training is designed to make Operators and Engineers understand security risks for OT systems, the impacts of their own behavior and the golden rules to keep your operations cyber resilient.

Your staff interact with critical OT systems on an everyday basis. They implement, maintain and operate these systems, therefore it is essential to ensure that all personnel fully understand the security risks relevant to their duties and the impact their behaviour can have on your organisation's security.

The Online OT Security Awareness Training is designed to address the core concerns of engineering professionals. We provide a basic training that can be used as-is but can also be customized to meet your organisation's specific requirements and incorporated into existing e-learning platforms. This tailoring ranges from branding (logos, corporate identity, etc), adding specific languages, to adding company specific content. The course has an estimated completion time of two hours, with the ability for management to generate reports on staff completion rates.

Key Takeaways

- Understand the importance of security requirements for both greenfield and brownfield environments
- A solid foundation of OT Security knowledge aimed to help students comprehend and think critically about OT Security
- Learn OT security golden rules to keep operations safe, secure and resilient in a cost effective manner

Course Content

The training rewards participants with a printable certificate, provides start and stop convenience to fit to employees work schedules and demonstrates your organisation's commitment to protecting your employees, assets and community. The standard Online OT Security Awareness Training consists of 4 main modules:

- Introduction to OT Security
- Why OT Security is important
- OT Security Mitigation Strategies
- OT Security Golden Rules to reduce cyber risk for Operators and Engineers
