Online OT Security Awareness
Interactive, engaging and customisable e-learning tailored to your organisation to help staff recognise and reduce cyber risks against your Operational Technology.

Key Takeaways
- Incredibly scalable learning to have impacts across the entire organisation
- Flexible and modular programs to reach various roles and knowledge levels
- Make it unique with highly customised content and branding options

OT Security Essentials Training
A comprehensive 2-day training designed to help you understand and improve the security of your OT environment.

Key Takeaways
- Learn to better recognise cyber security threats to your OT domain
- Break down and understand real-world incidents and case studies
- Know how to address OT security risks

Advanced Hacking Training
An intensive 3-day training specifically designed to up-skill technical employees responsible for securing mission-critical OT systems.

Key Takeaways
- Gain real-life attack experience
- Train offensive security skills with hands-on lab exercises
- Deep dive into industrial cyber attack methodologies

OT Cyber Threat CADET™
A self-contained training kit to be used in a classroom or private learning setting. An all-in-one physical learning solution which allows OT security staff to train and develop cyber security skills in a no-risk, small-scale production environment.

Key Takeaways
- Understand the approach from the attackers perspective
- Play real-life attacking scenarios with included step by step lab tutorials
- Specially designed flight case for convenient storage and transportation

OT Security Awareness Campaigns
A whole program designed to drive short, medium and long term knowledge gains, awareness and behavioural change for staff who interact with OT.

Key Takeaways
- A blended learning approach which can include eLearning, gamification and video
- Enable benchmarking and create measurable impacts towards strong OT security
- Tailored to your organisation’s challenges, target groups and goals
